Is PI a JCCC Member? □ Yes □ No

Please fill out completely and in detail in order to avoid processing delays.

1. If JCCC member, which JCCC program area are you in? FAU# _________________
   □ Cancer and Stem Cell Biology
   □ Cancer Molecular Imaging
   □ Cancer Nanotechnology
   □ Gene Regulation
   □ Health And At-Risk Populations
   □ Patients and Survivors
   □ Signal Transduction and Therapeutics
   □ Tumor Immunology

2. What are your specific requests regarding this project? Check all that apply.
   □ Grant applications
   □ Data analysis for manuscript/abstract preparation
   □ Clinical trial design
   □ Other: __________________________________________

3. Brief description of your project (less than 50 words):
   __________________________________________________________________________________________
   __________________________________________________________________________________________
   __________________________________________________________________________________________
   __________________________________________________________________________________________

4. Project costs:
   An estimate of project costs will be provided after the initial consultation meeting. JCCC members will receive 5% discounted rate.

   For assistance with grant applications: Appropriate biostatistics support is expected to be budgeted in the grant application with BASE Unit Statistician(s) as Co-Investigator(s). Specific effort levels will be determined between the PI and the Statistician(s).

   Data Analysis: the Project PI is expected to fully cover the costs of the programmer’s effort levels.

   Clinical Trials: UCLA investigator-initiated clinical trials are advised to include BASE Unit Statistician(s) as Co-Investigator(s) with a proper budget.

I have read the above guidelines and accept its terms to receive BASE Unit services.
